CARDIAC | Assessing a Medicaid Randomized Insurance Experiment within Community Clinics

- **Term:** 8/23/2011 – 3/31/2016
- **Grantee:** Oregon Health & Science University
- **Sub-recipient:** OCHIN, Inc.
- **Funding Agency:** National Institutes of Health/National Heart, Lung, and Blood Institute

This study will assess the impact of public insurance policy changes on receipt of CVD preventive care for OCHIN clinic population. This study aims to provide a national model for linking EHR/Medicaid data for preventive care surveillance in the insured and uninsured safety net population.

**Potential Impact**

This study evaluates how two major health policies affected safety net patients. Results have shown the importance of continuous health insurance on patients’ receipt of preventive care, and have important implications for state and national assessments of health policy impacts.
